

Preventing defeating of protective devices on machinery

Module 3: Operation of machines

March 30th 2016

Target group

- Machine operators, including purchasers
- Safety delegates
- OSH professionals
- Industry association representatives
- Students
- Prevention experts

Learning targets

Following successful completion of the module, the course participants are to have acquired the following knowledge:

1. Identification in the procurement process of whether a machine on the market offers a sufficiently little incentive for defeating
2. Possible measures in the plant for avoidance of defeating in plant operations, and obligation for their use

Duration of the tuition unit: 30 minutes

| Module 3: Operation of machines | | |
|--|--|---|
| Duration (minutes) | Content | Materials |
| 5 | Procurement process Purchase of machines with a low incentive for defeating | Slides/speakers' notes |
| 20 | Procedure in the event of defeating being detected | Slides/speakers' notes https://stop-defeating.org/en/dealing-with-defeating-of-safeguards-within-the-company/ |
| 5 | Example from the field | Slides/speakers' notes |
